OFLC Announces the Transition of Posting Application Processing Times to the FLAG System Website

The Office of Foreign Labor Certification (OFLC) is making this public service announcement to alert employers and other interested stakeholders that the publishing of application processing times has been transitioned to the Foreign Labor Application Gateway (FLAG) system website. Stakeholders will be able to access the application processing times by clicking the Processing Times link on the FLAG homepage.

As a reminder, starting today, May 1, 2020, the legacy iCERT System will no longer be accessible to account holders and the general public will be redirected to the FLAG System. iCERT System account holders who need to request a specific case action on an application submitted in the iCERT System (e.g., withdraw applications, request reconsideration, etc.) should continue to contact the relevant OFLC program helpdesk for review and appropriate action.
