### Guatemalan man in ICE custody passes away in Georgia

ATLANTA — A Guatemalan man in the custody of U.S. Immigration and Customs Enforcement (ICE) at the Stewart Detention Center in Lumpkin, Georgia, died Sunday at an area hospital.

Santiago Baten-Oxlaj, 34, was pronounced dead at 5:03 a.m. local time by medical professionals at the Piedmont Columbus Regional Hospital, in Columbus, Georgia, where he had been hospitalized since April 17, 2020.

The preliminary cause of death was listed as complications related to COVID-19.

Consistent with the agency's protocols, the appropriate agencies have been notified about the death, including the Department of Homeland Security's (DHS) Office of Inspector General (OIG), and the ICE Office of Professional Responsibility (OPR). Additionally, ICE has notified the Guatemalan consulate and Baten-Oxlaj's next of kin.

ICE is firmly committed to the health and welfare of all those in its custody and is undertaking a comprehensive agency-wide review of this incident, as it does in all such cases. Fatalities in ICE custody, statistically, are exceedingly rare and occur at a fraction of the national average for the U.S. detained population.

The agency's comprehensive review will be conducted by ICE senior leadership, including Enforcement and Removal Operations (ERO) and the Office of the Principal Legal Advisor (OPLA).

On March 2, 2020, ERO Atlanta arrested Baten-Oxlaj at the Marietta, Georgia, Municipal Probation Office pursuant to his conviction for driving under the influence. On March 26, 2020, an Immigration Judge granted Baten-Oxlaj voluntary departure under safeguards to Guatemala.

At the time of his death, Baten was awaiting departure from the United States.

ICE's Health Service Corps (IHSC) ensures the provision of necessary medical care services as required by ICE Performance-Based National Detention Standards and based on the medical needs of the detainee. Comprehensive medical care is provided from the moment detainees arrive and throughout the entirety of their stay. All ICE detainees receive medical, dental and mental health intake screening within 12 hours of arriving at each detention facility, a full health assessment within 14 days of entering ICE custody or arrival at a facility, and access to daily sick call and 24-hour emergency care. Pursuant to our
