Two-Step Verification Method

Every time you log in, you will be given a verification code. What is your preferred method to receive your verification code?

- ☒ **Use an Authentication App**
Retrieve codes from an authentication app (such as Authy or Google Authenticator) on your mobile device.

**What is an
Authentication
App?**

- ☐ **SMS Text Message**
Receive a text message to your mobile device when signing in.

- ☐ **Email**
Receive an Email when signing in.

You can use most Time-Based, One-Time Password (TOTP) applications for added security, which will ask you to enter a unique verification code generated by the selected application on your mobile device.

USCIS advises that you read the privacy policies of any application you use, especially if you share any personal information. USCIS is not responsible for the information collection practices of non-USCIS applications.

Using an Authentication Application

Authentication apps generate security codes for signing into sites that require a high level of security. You can use these apps to get security codes even if you don't have an internet connection or mobile service.

If you choose to utilize this option for setting up a two-step verification on your account, you will need to download and install an authentication app on your device. You can use most Time-Based, One-Time Password (TOTP) apps.

Here are a few options to get you started:

- Android options: [Authy](#), [Google Authenticator](#), [Microsoft Authenticator](#).
- iOS options: [Authy](#), [Google Authenticator](#), [Microsoft Authenticator](#).

Enter your verification code

You requested to use an authentication app to generate a secure verification code to log into your USCIS account.

An authentication app is a mobile security application that generates secure verification codes. You can use any authentication app you prefer.

Scan this QR code with your app. If you can't use the QR code, [enter this text code](#) instead.

Please enter the secure verification code from your authentication application.

What is a QR code?

A QR code stores URLs and other information in a series of black and white squares that are read by your smartphone camera.

If you see the "Password is invalid." message, please verify:

- You are using the 6-digit numeric verification code associated with your authentication app account.
- You enter the 6-digit numeric verification code exactly as shown.

If you had a previous QR code for this account, try deleting it, and rescan the QR code on top of this page using your authentication app. It is possible your app is not time synced correctly. Please refer to your app for troubleshooting tips.
