

## **December 16, 2022. Office of Foreign Labor Certification Publishes 2023 H-2A Monthly Adverse Effect Wage Rate (AEWR) for Herding or Production of Livestock on the Range**

The Employment and Training Administration has published a notice in the *Federal Register* announcing the new AEWR for occupations involving herding or production of livestock on the range for the H-2A Program. AEWRs are the minimum wage rates the Department of Labor has determined must be offered and paid by employers to H-2A workers and workers in corresponding employment to help ensure the Department meets its statutory obligation to certify that the employment of H-2A foreign workers will not adversely effect the wages of agricultural workers in the U.S. similarly employed. The notice announces the new national monthly AEWR for herding or production of livestock on the range.
