This is step-by-step directions on how to create a myUSCIS account, with screen shots, including an explanation of what two-factor authentication options there are and what to consider when choosing one, done by AILA's Practice & Professionalism Center.

1. Go to <u>https://myaccount.uscis.gov/</u> and select **Create an account**.

3. Once you hit **Sign Up**, you will get the following notification that an email has been sent.

4. Go to your email and click on the link USCIS sent you. It will call you to create a password that is 8 to 64 characters that can contain letters, numbers, special characters, and emojis. Phrases are the most secure types of passwords, because they are easier to remember and long enough that they are hard to brake.

4. Once you submit a password, the system will prompt you to choose a method for two-factor authentication. There are three options to two-factor authentication: text, email, or application.

5. If you select **Authentication Application** (the most secure option) and **Submit**, you will get a bar code square.<sup>1</sup>

<sup>&</sup>lt;sup>1</sup> The application method is the most secure option. However, we do not know if you will be permitted to save your account information for login easily, or if you will need to verify the account with the second authorization every time someone goes in the system. Therefore, if you have paralegals who are going to be logging in frequently, or sharing the burden of data entry, it may be worth it to select an email everyone has access to, or a text-capable phone number that everyone can check, so that anyone can get and submit the second authorization without having to bother the lawyer the account is tied to repeatedly to get that code. Be strategic about what two-factor authentication method you choose. If you choose text or email, that number or address will be pinged and you will have to verify it in a similar way as the application steps below.

U.S. Citizenship and Immigration Services
Your email address has been successfully confirmed.
Two-Step Verification Method
Every time you log in, you will be given a verification code. What is your preferred method to receive your verification code?
Use an Authentication App Retrieve codes from an authentication app (such as Authy or Google Authenticator) on your mobile device.     What is an Authentication App?     Authentication App?     Authentication
SMS Text Message Receive a text message to your mobile device when signing in.
Email Receive an Email when signing in.
You can use most Time-Based, One-Time Password (TOTP) applications for added security, which will ask you to enter a unique verification code generated by the selected application on your mobile device.
USCIS advises that you read the privacy policies of any application you use, especially if you share any personal information. USCIS is not responsible for the information collection practices of non-USCIS applications.

6. Pull up (or download and open) an Authentication App (<u>Google Authenticator</u> or <u>Microsoft</u> <u>Authenticator</u> both work well). In both the mentioned applications, click the **plus symbol** at the top right, to add an account.

7. It will open a camera for a QR code. Put the square your app shows in front of the image on your desktop until it adds the account. (This image is from Microsoft Authenticator.)

8. Once the account is opened in the application, it will give you a numerical code. Put the code you are given by the application into the registration page. (Note that if you had selected text or email, you would have received a code by the method you selected and had to type it in as well.)

9. The system will give you a backup code. Keep this code, as it will help you login if you are ever without Wi-Fi, required to get it on your Authentication App.

If you lose access mobile device or c	to your authentication device (you get a new
backup code to log	gin to your USCIS account. If you change and
confirm a new two	-step verification method preference, your old
code will no longe	r work.
Please print or say safe so that you a	/e a copy of this code, and store it somewhere re not locked out of your account.
Yourk	packup code is: 6ba

10. Next, you will be prompted to do 5 password reset answers. The things to select from are a bit unusual. Just remember that your answer doesn't need to be accurate to life—it just needs to be memorable to you.

Set five securit password.	y questions. You must remember the answers to these questions if you ever need to reset you
